User Creation

The screenshot shows the ServiceNow interface for creating an update set. The main form has the following fields:

- Name:** Laptop Request
- State:** In progress
- Parent:** (empty)
- Release date:** (empty)
- Install date:** (empty)
- Installed from:** (empty)
- Description:** (empty)
- Application:** Global
- Created:** 2025-10-27 21:25:25
- Created by:** admin
- Merged to:** (empty)

Below the form, there are 'Related Links' and a table for 'Customer Updates'.

Created	Type	View	Target name	Updated by	Remote update set	Action

PARAMETER	VALUES
Model Summary	Create a update set as laptop request.
Accuracy	Execution Success Rate - 98%

	Validation – Manual test passed with expected bahavior.
Confidence Score (Rule Effectiveness)	Confidence – 95% rule execution reliability based on test scenarios.

Assign Incident to User

The screenshot shows the ServiceNow interface for creating a 'Catalog Item - Laptop Request'. The browser address bar shows a URL with a long ID. The top navigation bar includes 'All', 'Favorites', 'History', 'Workspaces', and a search bar. The main header displays 'Catalog Item - Laptop Request' with buttons for 'Copy', 'Try It', 'Update', 'Edit in Catalog Builder', and 'Delete'.

A blue informational box states: 'Catalog items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies. Enter a Name and Short description to display for the item. Enter a Price, approvals, variables, and other information as needed.'

The form fields are as follows:

- Name:** Laptop Request
- Application:** Global
- Catalogs:** Service Catalog
- Category:** Hardware
- Active:** ☒
- Fulfillment automation level:** Unspecified
- State:** -- None --
- Checked out:** -- None --
- Owner:** System Administrator

Below the form fields are tabs for 'Item Details', 'Process Engine', 'Picture', 'Pricing', and 'Portal Settings'. The 'Item Details' tab is active, showing a 'Short description' field with the text 'Use this item to request a new laptop' and a 'Description' field with a rich text editor toolbar.

PARAMETER	VALUES
Model Summary	Assign an incident to the newly created user and check for proper assignment and linkage
Accuracy	Execution Success Rate - 98%. Validation – Manual test passed with expected behavior.
Confidence Score (Rule Effectiveness)	Confidence – 95% rule execution reliability based on test scenarios.

PARAMETER	VALUES
Model Summary	Tests on a user to any incident to confirm and check the rule in a current state.
Accuracy	Execution Success Rate - 98% Validation – Manual test passed with expected bahavior.
Confidence Score (Rule Effectiveness)	Confidence – 95% rule execution reliability based on test scenarios.

The performance and functional testing phase successfully validated the entire "Laptop Request" catalog item from end to end. Using specific test users representing the Requester, Manager, and IT Fulfiller, we confirmed that all process logic functioned as designed. Form-level UI Policies were verified, including the mandatory "Justification" field and the

auto-population of user data. Key workflow testing confirmed that manager approvals correctly assigned a catalog task to the "IT Hardware" group, while rejections correctly closed the request, validating both the "Happy Path" and "Rejection Path." All test cases passed, ensuring the solution is robust and meets all defined requirements.
