User Story

As an employee of the organization, I want to easily request a laptop through a dynamic and interactive Service Catalog form so that I can complete the request quickly, receive timely approval, and ensure accurate information is submitted without delays.

Project Overview

The project aims to design and implement an automated laptop request system through a dynamic Service Catalog form. This system will simplify the laptop request process for employees, ensure accurate data collection through conditional fields, allow users to reset the form easily, and maintain proper governance by tracking all changes for deployment and auditing purposes.

Problem Statement

Employees in the organization need a quick and efficient way to request laptops for work. The current process is manual and prone to delays, with no dynamic form behavior to guide users or ensure accurate data collection. To address this, a Service Catalog item needs to be created, allowing users to easily request a laptop, with dynamic fields, clear instructions, and additional functionality like resetting the form if needed. The solution should also ensure all changes are tracked for governance and deployment.

Project workflow

- Milestone 1: **Update set**
- Milestone 2: **Service Catalog Item**
- Milestone 3: **UI Policy**
- Milestone 4: **UI Action**
- Milestone 5: **Export Update set**
- Milestone 6: **Login to another Instance**
- Milestone 7: **Testing**
- Milestone 8: **Conclusion**

Milestone 1: Update set

Activity: Create Local Update set

- Open service now.
- Click on All >> search for update sets
- Select local update sets under system update sets

- Click on new
- Fill the following details to create a update set as: “Laptop Request”
- Click on submit and make current
- By clicking on the button it activates the update set .

Milestone 2: Service Catalog Item

Activity: Create Service Catalog Item

- Open service now.
- Click on All >> service catalog
- Select maintain items under catalog definitions
- Click on New.

Activity: Add variables

Step1:

- After saving the catalog item form scroll down and click on variable(related list)
- Click on new and enter the details as below
 - Variable 1:Laptop Model
 - Type: Single line text
 - Name: laptop_model
 - Order:100
- Click on submit
- Again click on new and add Remaining variables in the above process

➤ Variable 3:Additional Accessories

Type: Checkbox

Name: additional_accessories

Order:300

The screenshot shows the 'Variable - Additional Accessories' configuration page in ServiceNow. The 'Application' is set to 'Global' and 'Active' is checked. The 'Type' is 'CheckBox'. The 'Catalog item' is 'Laptop Request'. The 'Order' is '300'. There are checkboxes for 'Mandatory', 'Read only', 'Hidden', 'Unique', and 'Disable automatic slot fill based on user context'. At the bottom, there is a 'Question' tab with fields for 'Question' (Additional Accessories), 'Name' (additional_accessories), 'Conversational label', and 'Tooltip'. Buttons for 'Copy', 'Update', and 'Delete' are at the bottom left.

➤ Variable 4: Accessories Details

Type: Multi line text

Name: accessories_details

Order:400

The screenshot shows the 'Variable - Accessories Details' configuration page in ServiceNow. The 'Application' is set to 'Global' and 'Active' is checked. The 'Type' is 'Multi Line Text'. The 'Catalog item' is 'Laptop Request'. The 'Order' is '400'. There are checkboxes for 'Mandatory', 'Read only', 'Hidden', and 'Disable automatic slot fill based on user context'. At the bottom, there is a 'Question' tab with fields for 'Question' (Accessories Details), 'Name' (accessories_details), 'Conversational label', 'Tooltip', and 'Example Text'. Buttons for 'Copy', 'Update', and 'Delete' are at the bottom left.

Step2:

- After adding above variable which are added to newly created catalog item
- Then save the catalog item form

The screenshot shows the ServiceNow interface for editing a catalog item named 'Laptop Request'. The breadcrumb trail is 'Catalog Item - Laptop Request'. The main form area has a 'Meta' field. Below the form are buttons for 'Copy', 'Try It', 'Update', 'Edit in Catalog Builder', and 'Delete'. There are also 'Related Links' for 'Item Diagnostic' and 'Run Point Scan'. A horizontal menu shows various tabs: 'Variables (4)', 'Variable Sets', 'Catalog UI Policies (1)', 'Catalog Client Scripts', 'Available For', 'Not Available For', 'Categories (1)', 'Catalogs (1)', 'Catalog Data Lookup Definitions', 'Related Articles', and 'Related Catalog Items'. The 'Assigned Topics' section is also visible. At the bottom, there is a table of questions for the catalog item.

Type	Question	Order
Single Line Text	Laptop Model	100
Multi Line Text	Justification	200
CheckBox	Additional Accessories	300
Multi Line Text	Accessories Details	400

Navigation: 1 to 4 of 4

Milestone 3: UI Policy

Activity: **Create Catalog UI policies**

- Click on all>> search for service catalog
- Select maintain item under catalog definition
- Search for ‘laptop request’ which is created before
- Select ‘laptop request’ and scroll down click on “Catalog Ui policies”
- In the catalog ui policies related list tab click on new
- Give short description as: show accessories details
- Set the Catalog Condition in the related list tab ‘when to apply’
[field: additional_accessories, operator: is, value: true]

dev199780.service-now.com/now/nav/ui/classic/params/target/catalog_ui_policy.do%3Fsys_id%3D87d5de2ac3707210aa441c377d0131c7%26sysparm_record_target%3Dcatalog_ui_policy%26sysparm_r...

Applies on Catalog Tasks ☐

Applies on Requested Items ☐

Apply the catalog UI policy actions when the form is loaded or when the user changes values on the form

On load ☒

Reverse the effects of the catalog UI policy actions when the Conditions evaluate to false

Reverse if false ☒

- Click on **save**.(do not click on submit)
- Scroll down and select 'catalog ui action'
- Then click on new button

- Select variable name as: accessories_details

Order:100

Mandatory: True

Visible : True

- Click on save and again click save button of the catalog UI policy form

The screenshot shows the 'Catalog UI Policy Action - accessories_details' form in ServiceNow. The form includes the following fields:

- Catalog Item:** Laptop Request
- Variable name:** accessories_details (highlighted with a green border)
- Order:** 100
- Application:** Global
- Mandatory:** True
- Visible:** True
- Read only:** Leave alone
- Value action:** Leave alone
- Field message type:** None

At the bottom of the form, there are 'Update' and 'Delete' buttons.

The screenshot shows the 'Catalog UI Policy - show accessories details' form in ServiceNow. The form includes the following fields:

- Applies to:** A Catalog Item
- * Catalog Item:** Laptop Request
- * Short description:** show accessories details
- Application:** Global
- Active:** ☒

Below the form, there is a 'When to Apply' section with a 'Script' tab. The script contains the following conditions:

```
1. The catalog UI policy is Active
2. The items in the Conditions field evaluate to true
3. The field specified in the catalog UI policy is present on the specified catalog item
```

The 'Catalog Conditions' section shows a condition: 'additional_accessories' is true. The 'Applies on a Catalog Item view' checkbox is checked. The 'Applies on Catalog Tasks' and 'Applies on Requested Items' checkboxes are unchecked. The 'On load' checkbox is checked. The 'Reverse the effects of the catalog UI policy actions when the Conditions evaluate to false' checkbox is checked.

At the bottom, there is a table titled 'Catalog UI Policy Actions' with the following data:

Name	Read only	Mandatory	Visible	Order
accessories_details	Leave alone	True	True	100

Milestone 4: UI Action

Activity: Create UI action

- Open service now.
- Click on All >> search for ui action
- Select UI actions under system definition
- Click on new
- Fill the following details to create ui action

Table: shopping cart(sc_cart)

Order:100

Action name: Reset form

Client : checked

Script:

```
function resetForm() {  
  g_form.clearForm(); // Clears all fields in the form  
  alert("The form has been reset.");  
}
```

Click on save

The screenshot shows the ServiceNow UI Action configuration interface. The browser address bar displays a URL from dev199780.service-now.com. The page title is 'UI Action - Reset form'. The configuration is for a 'Reset form' action, associated with the 'Shopping Cart [sc_cart]' table, with an order of 100. The action is active and compatible with List v2. The script area contains the following code:

```
1 function resetForm() {  
2   g_form.clearForm(); // Clears all fields in the form  
3   alert("The form has been reset.");  
4 }  
5
```

The interface includes various settings like Application (Global), Form button, Form context menu, Form link, Form style, List banner button, List bottom button, List context menu, List choice, List link, and List style. There are also fields for Overrides, Messages, Comments, Hint, Onclick, and Condition. The Protection policy is set to '-- None --'.

Milestone 5: Export Update set

Activity: Exporting changes to another instances

- Click on All >> search for update sets
- Select local update set
- Select created update set i.e. ‘Laptop Request Project’
- Set the state to ‘Complete’
- In the related list Update tab, updates are visible which we perform under this update set.
- Click on export to XML ,it download one file

Milestone 8: Conclusion

The Laptop Request Catalog Item project successfully streamlines the process of requesting laptops within the organization by leveraging ServiceNow's Service Catalog capabilities. Through the implementation of a dynamic catalog item, the project ensures that users have an intuitive and user-friendly interface, reducing errors and improving efficiency. This project demonstrates how ServiceNow can be used to replace manual, error-prone processes with automated, efficient, and user-centric solutions. It not only improves service delivery but also enhances employee satisfaction by providing a modern and streamlined request experience.
