

PROJECT DESIGN PHASE II

DATA FLOW DIAGRAM & USER STORIES

Date	28.10.2025
Team ID	NM2025TMID04506
Project Name	Laptop Request Catalog item
Maximum Marks	4 Marks

DATA FLOW DIAGRAMS:

A Data Flow Diagram (DFD) is a visual representation of how information flows within a system.

In this "Laptop Request" project, the DFD illustrates how data moves from the user, through the system, to the manager, and finally to the IT fulfillment team.

Example

The flow begins with the User (External Entity) submitting the Laptop Request Form (Data Input).

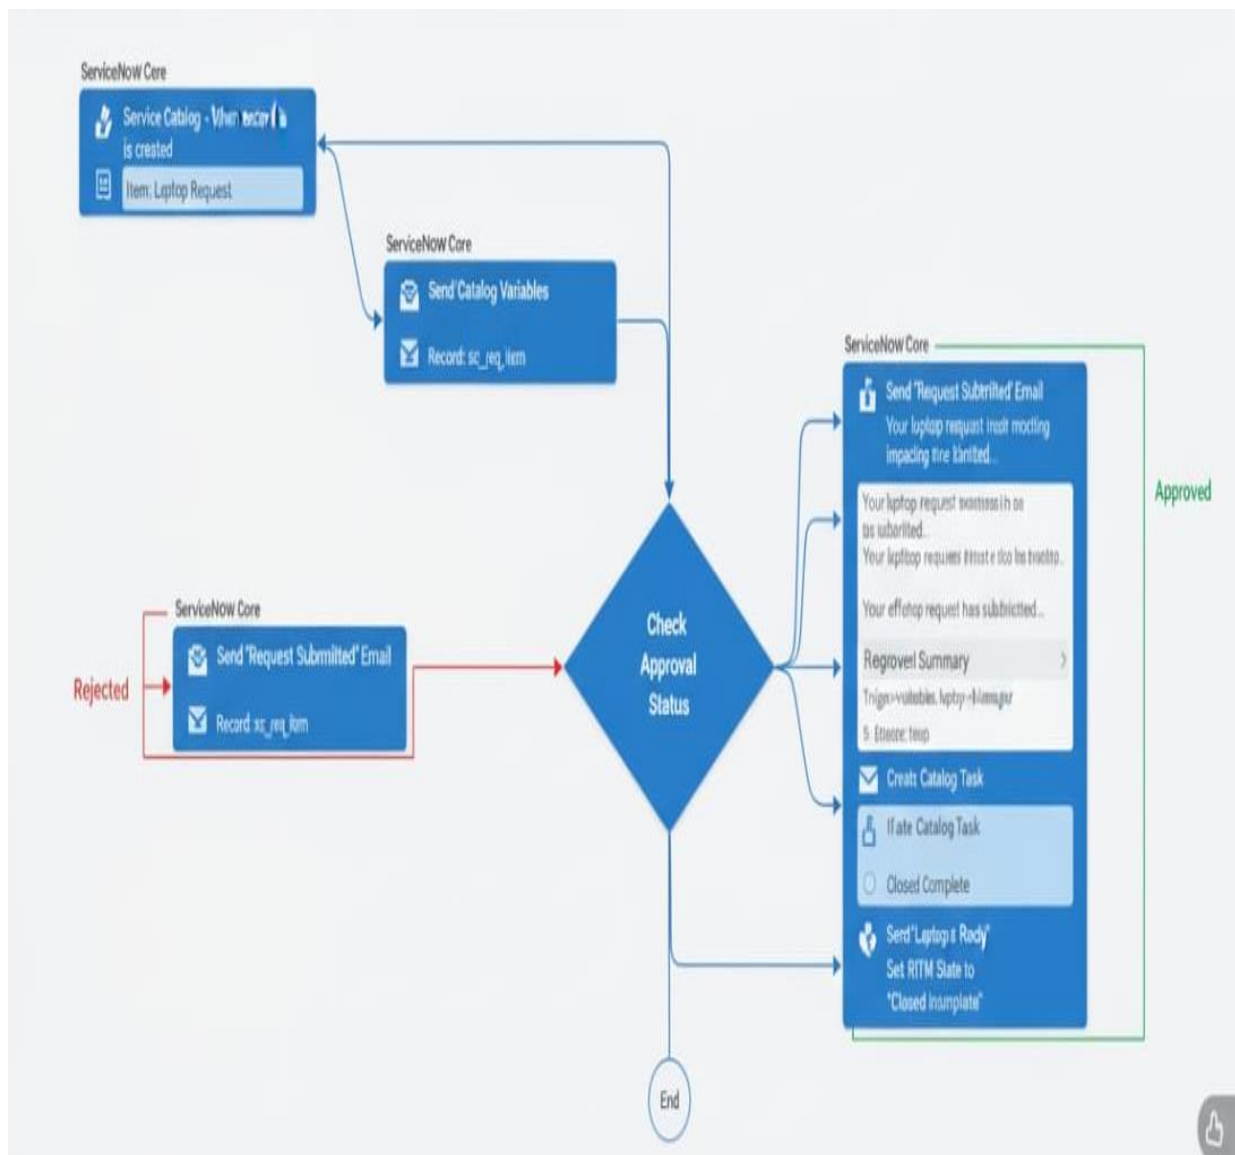

This data flows to the ServiceNow System (Process 1: Process Request).

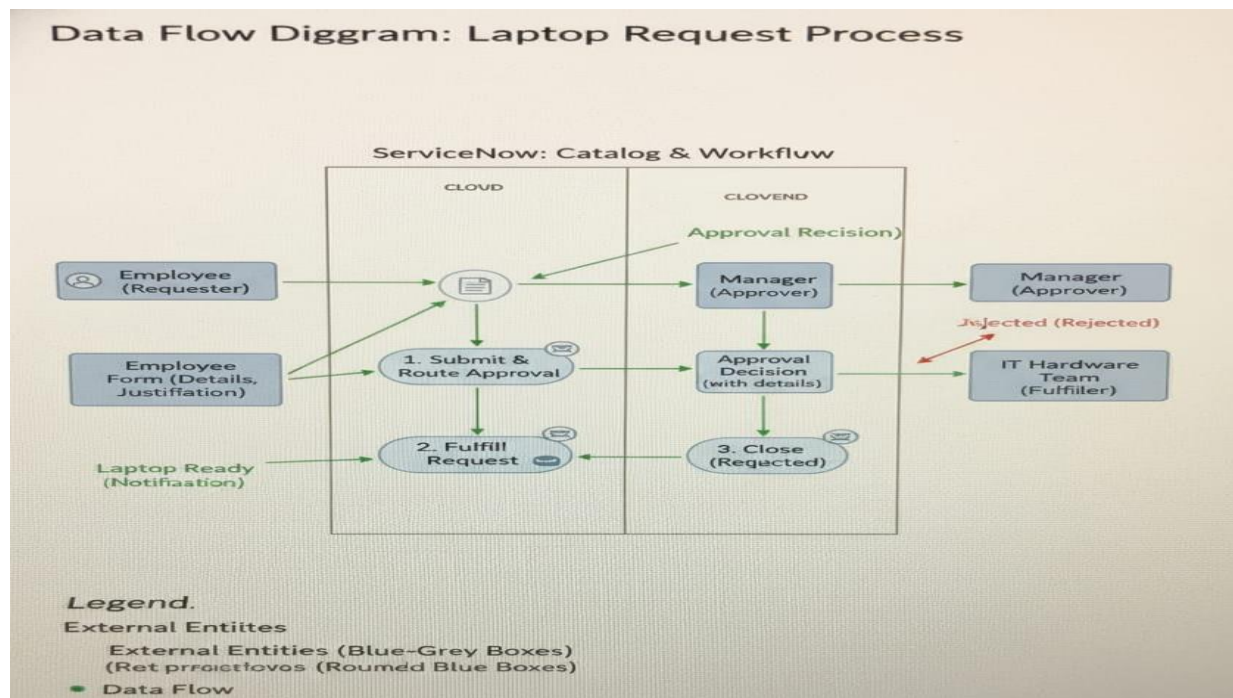

The system immediately sends Approval Data (like 'Justification' and 'Laptop Model') to the Manager (External Entity).

The Manager returns an 'Approved' or 'Rejected' Status (Data Input) to the ServiceNow System (Process 2: Process Approval).

If approved, the system generates Task Data (all form details) and sends it to the IT Hardware Fulfiller (External Entity) to be actioned.

This flow ensures data integrity and that all stakeholders receive the correct information at the correct time.

USER STORIES :

User stories define what different users need from the system in simple, goal-focused language.

USER TYPE	USER STORY NUMBER	USER STORY/TASK	ACCEPTANCE CRITERIA	PRIORITY
Requester (Employee)	USN-1	As an employee, I want to select a laptop from a clear list and provide a justification, so that I can submit a complete request easily.	The form must show laptop choices and block submission if the 'Justification' field is empty.	High
Approver (Manager)	USN-2	As a manager, I want to receive an email with all the request details so that I can approve or	An approval email must be sent to the user's manager. The email must contain the	High

		reject it with one click.	laptop model and justification.	
Fulfiller (IT Agent)	USN-3	As an IT Hardware agent, I want a task to be created in my group's queue only after a request is approved, so I know what to build.	A Catalog Task (SC_TASK) must be generated and assigned to 'IT Hardware' only if the manager's approval state is 'Approved'.	High
