Problem – Solution Fit Template

The Problem–Solution Fit ensures that the solution developed truly addresses the user’s or organization’s problem. It validates whether your idea aligns with the actual needs of users and business goals. This process helps IT service designers and administrators identify workflow inefficiencies, user pain points, and improvement opportunities in enterprise systems like ServiceNow.

Purpose

- ✓ Identify and address inefficiencies in the current laptop request and approval process.
- ✓ Enhance employee satisfaction and productivity by automating manual IT request workflows

- ✓ Improve asset tracking, approval transparency, and timely fulfillment through a standardized catalog item.
- ✓ Reduce IT administrative burden by centralizing hardware request management.
- ✓ Ensure security, accountability, and approval compliance for all hardware requests.
